VONAGE DIALER FOR SERVICE CLOUD VOICE

Easily Connect With More of Your Prospects

The concept seems simple, doesn't it? Your staff finds the prospect's number, dials it, and logs the call in the CRM. But over the course of a week, the work really adds up.

Now what if you could reclaim that time? Then you could focus on developing a higher connect rate and more successful conversations.

And Vonage Dialer for Service Cloud Voice helps by automating the manual tasks within every sales call. The Vonage Dialer comes with a toolkit designed to deliver huge productivity gains for outbound sales teams. Automated dialing, auto-logging, and voicemail drop* all save valuable seconds and minutes — which translates to time that can be used for extra calls and research.

Features

- **Direct dialing from Service Cloud Voice** eliminates manual dialing + decreases misdialing and downtime.

- **Automated dialing (Preview and Automatic modes)** increases efficiency with more calls and fewer manual tasks.

- **Dynamic dial lists** refresh and prioritize when a new lead comes in.

- **Auto-call recording*** complies with call recording legislation.

- **Voicemail drop*** allows your reps to automatically leave a voicemail and shortens time to the next call.

Meaningful Conversations Are Successful Conversations

Benefits

- **Increase sales rep efficiency** by automating manual tasks and eliminating wasted time

- **Close business faster** with an intelligent dialer that integrates with Service Cloud Voice to deliver key customer insights

- **Focus on the hottest leads first** and always speak to the right people at the right time
